### **DETAILED ACTION**

1. Applicants' Response to Office Action, received 9 January 2007, is acknowledged.  
Claims 1, 2, 3, 7, 8, 10, 11, 12, 16, 17, 23, 24, 25, 28, 29, 30, 31 and 34 have been amended.  
Claims 32 and 33 have been canceled.
2. Claims 1-31, 34, and 35 are pending and under consideration.

### **Rejections Maintained**

3. The rejection of claims 1-6 and 17-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for identity of component A, is maintained for the reasons of record.

Applicants argue that the amendment of the claims to recite that A is a component contained in the structure of said vehicles should obviate the rejection.

The examiner has considered applicants' argument, but does not find it persuasive. The amendments of the claims does not provide sufficient definition in order to determine what is or is not within the scope of "A".

### **Rejections Necessitated by Amendment**

#### **Claim Rejections - 35 USC § 112**

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1645

5. Newly amended claims 7-16, 21-31 and 34-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are drawn to a composition comprising lipid-based vehicles which comprise conjugates of the formula: A—(BC). B is a moiety comprising an internalizing peptide. C is a moiety comprising a biologically active agent. A is not defined concerning structure or function. The only restrictions on A appear to be that: A is a component conjugated to (BC) and appears to comprise a lipid (claim 2 and 6). Therefore, it is unclear what are the metes and bounds of component A.

6. Newly amended claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is drawn to an internalizing peptide which is "derived" from Antennapedia. It is unclear what are the metes and bounds of this term because the specification does not define the term.

### Conclusion

7. No claims are allowed.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of

Art Unit: 1645

the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
